***Examiner's Comment***

1. Claim 57 was inadvertently excluded from the previous action. Claim 57 has now been added to the Reasons for Allowance and listed among allowed claims on PTO-37.

***Reasons for Allowance***

2. Claims 42-45, 48-50, 52-55, and 57 are allowed.
3. The following is an examiner's statement of reasons for allowance: The prior art taken either singularly or in combination fails to anticipate or fairly suggest the limitations of the independent claim(s), in such a manner that a rejection under 35 U.S.C. 102 or 103 would be proper. The prior art fails to teach a combination of all the claimed features as presented in claim(s) 42 and 44, wherein the claimed invention comprises, in claim 42, a plurality of particles having an electrostatic property contained in a gaseous phase provided between the pair of substrates; and the particles each comprise a parent particle as a core, and plural child particles fixed to the parent particle in a manner to cover a substantially entire surface of the parent particle; in claim 44, a plurality of particles having an electrostatic property contained in a gaseous phase provided between the pair of substrates; and the particles each comprise a parent particle as a core, a first coating layer coating an entire surface of the parent particle and comprising a material having a higher softening point than that of the parent particle, a second coating layer coating an entire surface of the first coating layer and comprising the same material as that of the parent particle or a material having a lower softening point than that of the parent particle, and plural child particles fixed to the second coating layer in a manner to cover a substantially entire surface of the second coating layer, as claimed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
